

## **"The Killing Fields", authors: Eleftheria, Giorgos Chrysochoos**

*A comment from Katarzyna Kuczyńska:*

This text is more a draft and needs some more effort to become a full scenario, but it has a potential. I like character and monster design, you also included a map and a quest flowchart – a big plus. The story is interesting, and the choice has different consequences depending on Getalt's decision. But before the choice there's too little action, you have to think of some appealing situations, dialogs and challenges for a player.

*A comment from Artur Ganszyniec:*

Dobry ale nie do końca rozwinięty pomysł. Barwne postaci, ciekawa historia w tle oraz dobrze przedstawiony wybór to atuty tego tekstu. Mam natomiast wrażenie, że konsekwencje zostały zaledwie zarysowane i gracz nie będzie miał wystarczająco informacji, by w pełni docenić wydźwięk historii. Dokładne rozwinięcie i bardziej szczegółowe opisanie części fabularnej bardzo by pomogło tekstowi.

*Very good idea, but the text seem to be is rather sketched, then fully finished. The story features strong and believable characters, an interesting plot and a choice, that is introduced in a really good way . At the same time, the consequences are described very briefly and there is a serious risk, that the players will not have enough information to fully appreciate the story. A more detailed and elaborated description of the main plot would greatly improve the text.*
